

# The Wedge

## The advanced approach to simple and secure installations!

Waterway proudly introduces the Super Hi-Flow Wedge Suction, our latest innovation for easy yet worry free installation. The Wedge technology incorporates an advanced compression seal without the need for silicone, compensating rings and spot facing the back surface of the spa wall. The Suction installs through the spa wall completely assembled and is easily secured from the back simply by tightening the compression nut.

### Features:

- Provides easy installation
- Reliable seal you can depend on
- Requires no silicone
- Requires no compensating rings
- Requires no spot facing
- Provides lower profile
- Allows for inconsistent hole sizes
