READ AND FOLLOW ALL INSTRUCTIONS
SAVE THESE INSTRUCTIONS

IMPORTANT: Directional flow of water is essential for proper function. Serviceable Swing Check Valve is designed for both 2 1/2" Socket and 3" Spigot pipe.

IMPORTANT: Prior to installation of valve to fittings, remove lid/valve assembly (#2) to prevent accidental gluing of components.

CAUTION: DO NOT allow any glue into the valve body beyond the pipe stops.

MOUNTING INSTRUCTIONS
The Check Valve can be installed in either horizontal or vertical plumbing. For vertical plumbing, use only with upward flow. Follow CORRECT / INCORRECT diagrams below to ensure upward flow.

CORRECT

UPWARD FLOW (CORRECT)

INCORRECT

DOWNWARD FLOW (INCORRECT)
**SWING CHECK VALVE LOCATION**

- Water flow **MUST** be in the direction of the arrow.

**IMPORTANT:** Locate the Swing Check Valve at the lowest possible position in the plumbing system. Allow for a minimum of 18" water column. The weight of the water column assists in a greater valve seal and function.

**MAINTENANCE**

The clear cover permits easy inspection of the Swing Check Valve. If necessary, the valve can be disassembled for inspection of the o-ring and valve assembly. Before reassembly, lubricate o-ring thoroughly with appropriate silicone lubricant.

**SERVICEABLE SWING CHECK VALVE REPLACEMENT PARTS**
