

Introducing Waterway's **new line** of Variable Speed, 2-Speed, and SVRS Pumps.

ECONO-FLO VS FEATURES:

- Low Amp design for maximum energy savings
- Built-in programmable user interface with timer
- User-friendly programming
- Built-in Safety Vacuum Release System
- Built-in freeze protection
- Super quiet operation
- Compliant with all energy legislation
- Brushless permanent magnet motor
- 2 ½" union threads x 2" FPT with unions (included)
- Factory programmed to work "out-of-the-box"
- Totally enclosed fan-cooled motor protects against premature motor failure by not allowing dust, bugs, rodents, or other potentially harmful contaminants into motor housing

*Econo-Flo VS
Variable Speed*

ECONO-FLO 2-SPEED HYBRID FEATURES:

- Integrated programmable timer designed to achieve maximum energy efficiency and utility expense savings
- Motor and digital time clock integrated into one pump
- Easy to install and program
- Built-in freeze protection
- 2" union threads x 1 ½" FPT with unions (included)
- Meets Title 20 & Title 24 regulations
- Energy savings for fast payback on investment
- The most economical two speed pump to own and install
