

New & Updated For 2010

The **SupraMax Flow** pump provides super quiet operation and lower flow rates for a more versatile installation options.

The **SVL56 SVRS** pump has full-body entrapment protection, is self-calibrating with built-in electronics, and is easy to install.

The **UltraClean Pro** is now available in 26" and 32" models. Both have one-piece corrosion-proof bodies as well as a special lateral design for superior flow and better efficiency through long filter cycles.
